PROFESSIONAL EXPERIENCE AND PROJECTS

Full Stack Web Developer   2025 - Present

Dado App- Independent Personal Project

- Built and maintained a full-stack e-commerce application using Node.js, Express, **PostgreSQL**, **Sequelize**, **React.js**, and **Redux**.
- Designed **RESTful APIs** with advanced filtering, search, sorting, pagination, and soft delete functionality.
- Implemented JWT-based authentication and a role-based access control system (Super Admin, Admin, Employee) using custom middlewares.
- Integrated Cloudinary for secure image upload and management.
- Developed a responsive frontend with React, Redux, Axios, and React Router, including protected routes and role-based UI rendering.
- Implemented real-time search, category filters, and public product catalog views.
- Styled the application using Tailwind CSS with a mobile-first, component-driven approach.
- Built an admin dashboard with key business metrics and applied best practices for validation, error handling, and scalability.

Warehouse Management System - **Independent Personal Project**

Full Stack Web Developer   2024 - 2025

- Developed and maintained the backend using Node.js, Express, and PostgreSQL.
- Designed RESTful endpoints and business logic with role-based access control.
- Managed relational databases with Sequelize, defining relationships between users, sales, and products.
- Built the frontend using React.js and Redux, supporting multiple views based on user roles.
- Styled the UI with Tailwind CSS, following a mobile-first, responsive design approach.
- Implemented secure JWT authentication and cloud-based image storage using AWS S3.
- Handled API communication using Axios and maintained version control with Git and GitHub.
- Worked independently across the full development lifecycle, from planning to deployment.
